and Prices

Arches

There are a couple of options here, depending whether you want your arch inside, outside, or able to be moved about to suit the weather and also depending on the budget available.

Moon arch... there are two options for this 8ft (2.4m) moon arch. It needs to be inside, and for the fully flowered option (above left) it would cost £1,049 and the partly flowered option left, £724.

A more traditional arch... I also have recently taken delivery of a white metal traditional shaped arch (below left), which can be decorated with flowers and is priced similar to the arch above, £1049, again, we have options for adding more flowers or using a simple garland to reduce the price depending on your budget. When fully flowered, this arch is not moveable!

Moveable copper arch frame below...

There are a couple of options for this set up...the most basic is to decorate this arch with a garland made of foliage which covers the top and reaches part way down the sides. This would be £260. For little bit more, and have the foliage garland reach the floor would be £399.

I can also decorate the copper arch (left) with a full flowery garland (much more so than in this picture) and stand 2 big jars of flowers at the base. It is still moveable, just in more pieces.... £640.

If you would like something in between I can add in extra flowers/foilage or remove them....it helps if you have "an arch budget" then I can advise you the best way to achieve the arch that you would like.
